

HUZAIFA QURESHI

WORK EXPERIENCE

WordPress (CMS)

For the past three years, I've been Designing and Developing websites for a large array of businesses.

- 3+ Years of Experience with Tech-Firms/Teams, and 15+ Happy Customers
- Maintained a 100% client satisfaction rating and generated 10% growth in annual revenue by working closely with sales and support teams
- Opened five new accounts by providing prompt, consistent, quality customer service

WordPress Sales Executive woocommerce Services

- Building a professional e-commerce store on WordPress using woo-commerce
- Achieved sale growth in our client base by finding opportunities for affiliate programs with various companies to get more sales
- Boosted customer satisfaction by 10% by introducing a feedback check-in after three months of a sale

Something I see far too often in other WordPress Website developers is a reliance and drag-and-drop page builders, heavy themes, and bulky, unneeded plugins. The result is an incredibly slow site bloated with unused code that directly affects the users and search engine algorithms. This is the reason that I use lite weight themes and plugins so that your website run perfectly.
